Point of Commerce Solution

# TCxFlight POINT OF COMMERCE SOLUTION

## Elegant Design Extends Traditional Options

- › Traditional fixed function capabilities
- › Variety of solutions to core requirements
- › Small footprint with multi-touch display
- › Intuitive, quick-to-learn touch technology maximizes associate productivity

## On Demand Mobility

- › Push button responsiveness to planned or unexpected daily variation
- › Powerful function that is locked and docked for ready use

## Future Adaptability

- › Adjust to tomorrow's changing mobile needs
- › Adaptive, durable, and designed to grow with retailer and protect their investment

The new TCxFlight Point of Commerce Solution brings a new wave of options to retailers. Designed to address retailer's immediate, mission critical point of sale operations, the TCxFlight is an elegant POS, a small customer kiosk, and even a great store manager's workstation. But its real power comes with its ability to take everything mobile and thereby enable retailers to utilize the versatility of this hybrid solution in a variety of mobile use cases.

While mobility is an important element of TCxFlight, even more powerful is its immediate availability. The mobile unit can be locked and docked right where it can be used in one of several primary, traditional roles. In this way, not only can the mobile unit always be secured, but whenever required for mobile use, no time is lost locating and retrieving a given, special purpose mobile device. This versatile solution helps to consolidate equipment and save both money and time with the touch of a button.

The new TCxFlight features a solid base that provides a platform for secure storage, charging, and communications whenever the mobile unit is docked. This base features (4) standard PC USB ports, (2) 12V USB ports, and (1) 24V port, along with an Ethernet port for wired network and LAN communications. All cable connections are secured behind a unique back panel to prevent accidental or unauthorized disconnections.

An Innovative Hybrid Solution for  
Today's Traditional and Mobile  
Retailing Needs

Toshiba TCxFlight is a traditional solution to today's core retail requirements. With its elegant industrial design, TCxFlight offers an extension of the Toshiba Global Commerce Solutions portfolio and provides retailers a consistent look and feel across their store.

Shown: TCxFlight Point of Commerce Solution with Dock

Mobile devices are of limited value unless they are available anytime, and every time they are required. TCxFlight is reconfigurable on demand with the simple push of a button. Shown below, the mobile unit can be locked and docked right where it is used in any number of primary traditional roles when combined with the optional Dock feature.

Shown: TCxFlight Separation

The TCxFlight enables traditional or mobile solutions for today's retailers with the power and performance packaged in a rugged design.
